

Video Production Intern – Create Videos For And About Our Nation’s Veterans

Project Title	Video Production Intern – Create Videos For And About Our Nation’s Veterans
Project Summary	Create short, informative and entertaining videos about and for America's Veterans. These videos may be showcased on our VA social media channels including the main blog, VAntage Point http://www.blogs.va.gov as well as our Facebook, YouTube, Instagram and other social media platforms as appropriate
Country	United States

Project Description

The Department of Veterans Affairs, Digital Media Engagement (DME) Team is seeking motivated interns to produce creative videos that engage Veterans, that tell their stories, entertain and inform them. DME is a small, flexible group of professionals that value innovative and creative ideas and out of the box thinking. As a Video Production intern, you will work in all aspects of video production (pre-production, field production and post-production). You will be expected to possess knowledge of and experience with non-linear video editing software, HD video cameras, microphones and lighting. You must be able to plan, shoot and edit complete video packages, as well as add graphic elements such as lower-thirds, etc.

You must know how to convert and transcode High Definition video to a variety of professional video formats used in web-based delivery. You must have the ability to plan, organize, shoot and edit video.

As a Video Production Intern, your typical work assignments may include: researching and planning potential stories that will appeal to the VA social media audience; using digital cameras and microphones to capture audio and video material; editing select audiovisual/graphical elements into an engaging video for VA social media with an average duration of one minute. Required Skills or Interests Skill(s): storytelling; video editing; videography; audio recording; digital photography; graphic design.

Videography

Additional Information

You will need to provide your own camera, microphones and video editing software. If you use audio, music, images, video or graphics outside of those provided for you by DME, they must be royalty-free, non-copyrighted materials and approved by us. You must provide us with the source files and the final video files and caption files for each video.
